## Shalom Free Clinic's Vision

---

Shalom Free Clinic was the dream of a few people who thought they could do more for those with physical, mental, and spiritual health issues in our community. They decided that there had to be an alternative approach to help the uninsured and underinsured who needed medical care. As they gathered others, their dream became a reality. This dream of hope has brought forth the creation of the Shalom Free Clinic.

The Shalom Free Clinic is staffed entirely by both medical and non-medical volunteers. The clinic provides immediate intervention for basic medical and mental health services. Referrals will be provided as needed. See back page for a list of the cases we treat.
